## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9,10,11,12,13,14,16,17 & 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas (5,672,101) in view of Anderson (3,738,621). Thomas discloses a solar operated vent cover comprising: a vehicle (20) , a roof (21), solar cells (166A-166B), fans (200A-200B) which maybe inherently axial or radial situated, ventilator cover (130) that are solar operated and extends lengthwise, and with respect to claim 12, the air flow is directed towards the front (see figure). Thomas disclosed invention lacks a thermoelectric/peltier cooling device powered by solar cells. Howard (6,662,572) teaches thermoelectric coolers (26) powered by solar panel devices. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the disclosed invention of Thomas with thermoelectric solar powered panels as taught by Howard for providing electrical power to cooling device to provide efficient cooling.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas as applied to claim 1,12 above, and further in view of "Official Notice". It well known in the art to provide venting louvers that extends across a vehicle roof for increase air flow provision.
